<sup>1</sup> This week's total Cleared/Discharged is slightly less than last week's reporting because the Facility initially counted some positive rapid test results and positive PCR results together for certain same infections. Since the last Status Report, the Facility reviewed its data to remove any potential double-counting of the same infection.

<sup>2</sup> Staff vaccination totals reflect cumulative staff vaccinated, some of whom are no longer employed by the Facility. The Facility has received confirmation that 172 of its current staff are fully vaccinated and, of that number, 31 have received booster doses.
