

**Witnesses - Number - Weight of Testimony**

In evaluating the testimonial evidence, remember that you are not required to believe something to be a fact simply because a witness has stated it to be a fact and no one has contradicted what that witness said. If, in the light of all of the evidence, you believe that the witness is mistaken or has testified falsely or that he or she is proposing something that is inherently impossible or unworthy of belief, you may disregard that witness' testimony even in the absence of any contradictory evidence.

You should also bear in mind that it is not the number of witnesses testifying on either side of a particular issue that determines where the weight of the evidence lies. Rather, it is the quality of the witnesses' testimony that counts.

Thus, just because one witness testifies on one side of an issue and one witness testifies on the other side does not necessarily mean that you must consider the evidence evenly balanced. If you feel that one of the witnesses was more credible than the other, for whatever reason, you may find that the weight of the evidence lies on the side of that witness.

Similarly, just because there may be more witnesses testifying on one side of an issue than on the other does not mean that the weight of the evidence lies in favor of the

greater number of witnesses. Once again, it is the credibility or quality of the testimony that determines where the weight of the evidence lies.
